- Delivered within budget and met all project milestones

CLIENT	Renaker
DESIGN	Jolie Studio
LOCATION	Manchester, UK
DATES	Completed 2020

THE CLUB, DEANSGATE SQUARE CASE STUDY

Sanctuary in the city

Deansgate Square is Renaker’s groundbreaking residential development, offering a sanctuary away from the hustle and bustle of Manchester’s city centre whilst also embracing the exciting and diverse nature of central city living. Situated in the centre of the development’s iconic four towers is The Club – a luxury amenity building spanning over 22,000 sq ft.

Multi-sensory spaces

Tasked with creating the interiors for the amenity spaces, designers Jolie Studio sought to bring a unique, multi-sensory approach to the design. The result is a series of richly designed spaces – including tranquil lounges, an opulent dining space and an eclectic ‘tea room’ – in which residents can sit back, relax and socialise.

Crafting the furniture package

Providing consultancy, procurement and installation services, we supported the designers at Jolie and the Renaker team throughout the project, helping to refine the furniture package and providing peace of mind when it came to delivery and installation. Our dedicated project management team were on hand to make sure all key milestones were met.

“Working with TFP means having a strong partner on a project to make sure we deliver the best together. What we like most about working with TFP is how reliable they are.”
